## PLEASE READ THE FOLLOWING BEFORE YOU BEGIN!

- Students must themselves assure that the examination papers are complete.
- Students must provide the following information on the answer sheet:
- Examination code
- Personal initials
- ID-nr

The ID-nr must be recorded with both the appropriate numbers and by putting an " X " by the corresponding number in the columns below.

- Do not use pencils or pens with green ink when filling in answer sheets. Answer sheets must not be used for rough drafts.
- All answers must be recorded with an "X" under the letter you believe corresponds with the correct answer.
- Cancel an " $X$ " by filling in the box completely (boxes that are completely filled in will not be registered). " X " in two boxes for one question will be registered as a wrong answer.
- The attached example shows you how the answer sheet would be filled in if A were the correct answer for question 1, B correct for question 2, C correct for question 3 and D correct for question 4. An " X " under E indicates that you choose not to answer question 5.
- Your answers are to be recorded on the answer sheet. Answers written on the examination papers and not on the answer sheets will not be graded.
- There is only one right answer for each question. Because the questions are weighted equally, it can be to your advantage to answer the easiest questions first.
- Wrong answers are given -1 point, unanswered questions get 0 points (indicated by an "X" next to E") and correct answers are given 3 points.
- You can keep the examination papers.
